

THE ECONYL® REGENERATION SYSTEM

01_Rescue

The ECONYL® Regeneration System starts with rescuing waste, like fishing nets, fabric scraps, carpet flooring and industrial plastic from landfills and oceans all over the world.

That waste is then sorted and cleaned to recover all of the nylon possible.

02_Regenerate

Through a radical regeneration and purification process, the nylon waste is recycled right back to its original purity. That means ECONYL® regenerated nylon is exactly the same as virgin nylon.

03_Remake

ECONYL® regenerated nylon is processed into carpet yarn and textile yarn for the fashion and interior industries.

04_Reimagine

The beauty of ECONYL® regenerated nylon is that it has the potential to be recycled infinitely, without ever losing its quality. We believe circular design is the future and using ECONYL® is our first step on that journey.
